WORK EXPERIENCE

Web Developer   July 2021 - Present

Brod Solutions

Delivering high quality eCommerce solutions to our clients. Working on projects from maintaining our in-house sales analytics app to building custom features for our client's storefronts.

SKILLS

React, NextJS, React Native, Expo, Typescript, REST APIs

SUCCESS STORIES

Bulk Order Chart: A client needed a bulk order chart on their product page. This was a custom feature not offered by the eCommerce platform. After successfully building the chart, 6 other clients reached out saying they also wanted the feature. Due to reusable code, the ROI was fantastic.

Product Calculator: One client was moving from a custom built eCommerce platform to Shopify. They needed their product calculator to be in their new store. This calculator was used to make complex calculations and add the results to cart. The new calculator was designed efficiently and actually saved clients on total cost in the end compared to the old site.

RECENT PERSONAL PROJECTS

Pokedex App (currently in-progress)
https://github.com/BradPreston/rn-pokedex

Built using Expo, TypeScript, Zustand, Nativewind, Tanstack Query, GraphQL

Kazoo48 Film Festival
https://kazoo48.com

Built using Next JS, TypeScript, Stripe, and Vercel

One With The Riverbed
https://onewiththeriverbed.com

Built using Next JS, TypeScript, Tailwind, and Vercel
